Examples of Animals of a particular prohibited group shall not be construed as limiting the generality of the group.

SCHEDULE "B" TO BY-LAW 0000-2013
APPROVED ENCLOSURE REQUIREMENTS FOR PROHIBITED OR DANGEROUS
ANIMALS

Enclosure for Venomous Reptiles

1. Enclosures for venomous reptiles shall be kept indoors in a secure and locked area. All enclosures should be constructed of wood, fibreglass, ABS plastic or metal. Enclosures must be secure and key locked. All enclosures shall be kept within a secured (escape proofed) and locked area indoors. There shall be a sign displaying the words "LIVE VENOMOUS ANIMALS, DO NOT TOUCH", which shall be posted outside the secure and locked area and include a listing of emergency phone numbers.
2. The Owner shall ensure that antitoxins are provided pursuant to section 7.1 of the by-law.
3. The Owner of the venomous reptiles shall notify the local fire/rescue department to the fact that prohibited or dangerous animals are being kept within the Premises.

Enclosures for Constrictors

4. Enclosure for constrictors including, but not limited to Phthoridia (large Python) and Boidae (Boa), shall be constructed of solid wood, 1/2" thick of fibreglass, metal or PVC plastic of a size to allow movement of the Animal. All enclosures must be kept indoors and shall be secure and key locked. All provisions for safekeeping and care and maintenance must be adhered to.

Enclosures for Felids

5. Enclosures for Felids (large cats) shall be no less than thirty (30) x forty (40) feet comprised of nine (9) gauge chain-linked fence, which fence is to be ten (10) feet high with an additional three (3) feet on an angle to a height of twelve (12) feet. The top of the enclosure must be enclosed and shall be comprised of nine (9) gauge chain-linked fence with the required trusses. Main corner posts are to be three (3) inch metal posts. There will be additional cross posts placed horizontally at three (3) feet and six (6) feet from the bottom of the fence. The bottom of the enclosure shall be anchored securely to the ground every two (2) feet. Four inch reinforced mesh shall be attached to the bottom of the enclosure and shall extend no less than three (3) feet into the enclosure and be weighted down by rocks. Such enclosures shall provide an additional secured area attached to the main enclosure for the Felids when the enclosure is being cleaned. The access to the whole enclosure shall be through a double door entry system.
6. There is to be a second chain link fence six (6) feet out from the enclosure and at least four(4) feet high. Danger signs must be posted on the outer fence and be visible to the public.
